Summary: Computer Science and Engineering student with hands-on experience in Software Development, Artificial Intelligence, Machine Learning, and Data Analysis. Developed projects using Python and web technologies and participated in hackathons. Seeking an internship to apply technical skills and contribute meaningfully in the tech field.

SKILLS

Languages: Python, Java, C++, C, JavaScript, MySQL

Web Technologies: HTML, CSS, Node.js, Express.js

Tools & Platforms: Git, GitHub, VS Code, Jira

Core CS Subjects: DSA, OOP, Operating Systems, Computer Networks, DBMS, Theory of Computation

TECHNICAL PROJECTS

Online Voting System using Face Recognition | Python, Node.js, HTML, CSS

- Built a secure voting system with face recognition for user authentication, preventing duplicate or unauthorized voting.
- Developed backend in Node.js and Python for face detection; created a responsive frontend using HTML and CSS.
- Applied AI and computer vision in a real-world system, strengthening skills in secure and scalable system design.

Library Management System | Python, MySQL

- Developed a system for managing book records with user registration, login, search, issue/return, and fine calculation.
- Utilized Python modules (CSV, datetime, OS) for data processing; strengthened backend and database management skills.

INTERNSHIPS / EXPERIENCE

Tech Team Member & Organizer — Build for Bengaluru Hackathon 2026 | Bengaluru | 2026

- Served as a core tech team member for a 24-hour hackathon; contributed to end-to-end planning, coordination, and technical execution.
- Ensured seamless event delivery through cross-functional collaboration, demonstrating leadership and time management skills.
- Coordinated on-ground technical infrastructure to ensure smooth and successful hackathon operations.

CERTIFICATIONS

Microsoft Azure AI Fundamentals (AI-900) | Microsoft | 2025

HOBBIES & INTERESTS

Motorsport Enthusiast (Formula 1) — Follows race engineering strategy and performance analytics.

Team Sports — Builds collaboration, communication, and competitive drive.

Running — Reflects personal discipline and goal-setting.

Technology Tracking — Actively follows the latest tech trends and innovations to continuously upskill.

EDUCATION

B.E, Computer Science Engineering | Sri Krishna Institute of Technology, Bengaluru | CGPA: 8.1 | 2023 – 2027

II PUC | PCMCS | Amara Jyothi PU College, Karnataka State Board | 81% | 2021 – 2023
